Important Safety Information

What is FLUCELVAX® QUADRIVALENT (Influenza Vaccine)?

FLUCELVAX QUADRIVALENT is a vaccine that helps protect people aged 4 and older from the flu. Vaccination with FLUCELVAX QUADRIVALENT may not protect all people who receive the vaccine.

Please see additional Important Safety Information on back cover, and the US full Prescribing Information for FLUCELVAX QUADRIVALENT here.
**WHY IS IT IMPORTANT TO GET A YEARLY FLU SHOT?**

Millions of Americans are affected by the flu each year. A seasonal flu shot is the best way to help protect yourself from getting the flu.³

It’s important to get your flu shot every year, because the viruses that cause the flu are constantly changing from year to year.³

**WHAT IS A CELL-BASED FLU SHOT?**

When a flu shot is cell-based, it refers to how the shot is made.⁴

Most flu shots are produced by growing flu viruses in eggs. However, cell-based flu shots are produced by growing flu viruses in cells.⁴

**DID YOU KNOW?**

A CELL-BASED FLU VACCINE WAS DEVELOPED AS AN ALTERNATIVE TO TRADITIONAL EGG-BASED FLU VACCINES, WHICH ARE GROWN AND MADE IN CHICKEN EGGS.⁴

**WHAT IS FLUCELVAX QUADRIVALENT?**

FLUCELVAX QUADRIVALENT is a cell-based flu shot for prevention of seasonal flu in those 4 years and older. It helps protect against all 4 flu viruses contained in the vaccine.²

**FLUCELVAX QUADRIVALENT:**

- Does not contain egg protein or antibiotics²
- Is available in an option that contains no preservatives*²
- Is covered by Medicare Part B, Vaccines For Children (VFC), and most major health plans—some patients may even qualify for $0 copayment or deductible†‡

*FLUCELVAX QUADRIVALENT 0.5 mL pre-filled syringes contain no preservative. FLUCELVAX QUADRIVALENT 5 mL multi-dose vials contain thimerosal, a mercury derivative, added as a preservative.
†Talk with your insurance provider to understand your coverage benefits.
‡This information does not constitute a guarantee or warranty of coverage benefits.

**Important Safety Information (continued)**

Important Safety Information (continued)

Who should not get FLUCELVAX QUADRIVALENT?
You should not get FLUCELVAX QUADRIVALENT if you have had a severe allergic reaction to any of the ingredients in the vaccine.

Before receiving FLUCELVAX QUADRIVALENT, tell your healthcare provider about all medical conditions, including if you:

- have ever had Guillain-Barré syndrome (severe muscle weakness) within six weeks after getting a flu vaccine. The decision to give FLUCELVAX QUADRIVALENT should be made by your healthcare provider, based on careful consideration of the potential benefits and risks.
- have problems with your immune system or are taking certain medications that suppress your immune system, as these may reduce your immune response to the vaccine
- have ever fainted when receiving a vaccine

What are the most common side effects of FLUCELVAX QUADRIVALENT?

- pain, redness, or a raised hardened area or swelling where the vaccine was given
- headache
- tiredness
- muscle aches
- feeling unwell (malaise)

Additional side effects seen in children include:

- sleepiness
- irritability
- changes in eating habits

These are not all of the possible side effects of FLUCELVAX QUADRIVALENT. You can ask your healthcare provider for more information.

Ask your health care provider for advice about any side effects that concern you. To report SUSPECTED ADVERSE REACTIONS, contact Seqirus USA Inc. at 1-844-275-2461 or VAERS at 1-800-822-7967 or www.vaers.hhs.gov.

You are also encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Before receiving this vaccine, please see the full US Prescribing Information for FLUCELVAX QUADRIVALENT here. The information provided here does not include all that is known about FLUCELVAX QUADRIVALENT. To learn more, talk with your healthcare provider or pharmacist.
