Your flu shot is more important than ever.
Protect more than yourself.

IN THE US, AN ESTIMATED
39,000-100,000
FLU-RELATED HOSPITALIZATIONS CAN BE PREVENTED BY THE FLU SHOT EACH YEAR.*

The flu shot has always been important. This year, it’s imperative—to protect yourself, your loved ones, and your community from the flu. When you get your flu shot, you’ll be doing your part to reduce the burden of flu and help preserve scarce medical resources for healthcare providers and patients with COVID-19. It’s a small act that can make a big difference.

*From the 2010-2011 through 2018-2019 influenza seasons.
