Schedule their flu shot. Protect more than your child.

IN 2018-19
AN ESTIMATED
2.4 Million
CHILDREN* IN THE US AVOIDED THE FLU THANKS TO FLU VACCINATIONS¹

Your child’s flu shot is always important. This year, it’s imperative.² The flu shot reduces the chance of children getting the flu and spreading it to family members and classmates, while limiting severity and hospitalizations.² A simple act, and it’s never been more selfless.

GET THE FLU SHOT

*Ages ranged from 6 months to 17 years old.
